

Annex 3 – Procedure for handling suspected or confirmed cases of COVID-19 on the IMT School's residential campus

Presence of fever with or without cough or sore throat

In the event of fever with or without cough or sore throat, Students must isolate in their room and promptly communicate their health conditions to their General Practitioner/Family Doctor, the "Facilities" Office (Campus Management and Front Office), and the Secretariat Office indicating their telephone contact.

The Facilities Office staff reading the email promptly contacts the Students to inform them of meal delivery, room cleaning, and waste disposal procedures.

If the health conditions worsen at any time, Students must promptly contact 118 (or 112).

Management of a quarantined individual or a suspected/confirmed case of COVID-19

In the case of a quarantined person, possibly eligible for a swab or tested positive with health conditions that do not require transfer to the hospital, the School may have to undertake the isolation measures.

Since each student is assigned a single or double room for single use with bathroom, the person involved remains isolated in their room. Mask, thermometer, meals, and a kit for independent room cleaning and waste collection are provided.

If their health conditions deteriorate, Students are invited to promptly contact 118 (or 112).

The Facilities office, with the support of the SPP and the Competent Doctor, will periodically monitor the individual's health conditions remotely.

Meal delivery and waste disposal procedures

Food is served in special takeaway containers with disposable cutlery. The bag containing the meal is left on the floor in front of the room door. The individual is instructed to collect it after airing the room, washing hands, and putting on a mask. The individual is invited to put the leftovers in the original bag, which will be sealed inside a larger and more resistant bag and left outside the door. It will subsequently be collected by the School's cleaning service staff and disposed of according to the ISS guidelines:

In the event of a confirmed case, the Students and Staff of the IMT School make themselves available to the staff of the Prevention Department of the Northwest USL both for the epidemiological investigation and to implement all the provisions that will be communicated.

The aforementioned procedures may subsequently be revised according to the current legislation.
